Subject: SCE&G Proposed Rate Increase

SC Public Commission,

I am writing to formally voice my opposition to the proposed rate hike being considered on behalf of SCE&G. If approved, it would mark the 11th increase in SCE&G's base electric rates in five years, not including four upward rate adjustments to pay for fuel to make power, something that its customers can hardly afford.

Although, I will be at the hearings to physically protest, I preemptively urge the commission to reject the increase.
